

Made entirely from annually renewable resources, such as corn, Ingeo™ fibers have the performance of both natural and synthetic materials. In contrast to traditional thermoplastics and synthetics that rely on the earth's limited supply of petroleum as a base feedstock, Ingeo uses raw materials that are annually grown and in abundant supply.

Additionally, the performance benefits of Ingeo are inherent in the fiber, requiring no treatment or finish. The performance will not diminish or fade after washings or over time. Ingeo fibers provide a bridge between natural and synthetic fibers, combining the best performance attributes of the fibers.

## Temperature Ranges

Ingeo fibers have a range of melting temperatures and will bind with natural fibers as well as synthetics.

## Ingeo Worldwide Offices

Amsterdam, Hong Kong, London,  
Milan, Minneapolis, New York and Tokyo
