protective gear

Under fire conditions: Cool containers / tanks with water spray Water mist may be used to cool closed containers Fine dust dispersed in air may ignite. Risks of ignition followed by flame propagation or secondary explosions shall be prevented by avoiding accumulation of dust, e.g. on floors and ledges.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

6.1.1. For non-emergency personnel

- Use personal protective equipment as required
- Avoid contact with skin and eyes
- Avoid dust formation
- Remove all sources of ignition
- Sweep up to prevent slipping hazard

6.1.2. For emergency responders

- Use with proper personal protective equipment (see Section 8).

6.2. Environmental precautions

- Do not flush into surface water or sanitary sewer system
- Do not allow material to contaminate ground water system.

6.3. Methods and material for containment and cleaning up

- Clean up promptly by scoop or vacuum.
- Sweep up and shovel into suitable containers for disposal

6.4. Reference to other sections

- No information available

SECTION 7: Handling and storage

7.1. Precautions for safe handling

- Use personal protective equipment as required
- Avoid contact with skin and eyes
- Low hazard for usual industrial or commercial handling
- Workers should be protected from the possibility of contact with molten material during fabrication
- Avoid dust formation
- If small particles are generated during further processing, handling, or by other means, combustible dust concentrations in air may form

7.2. Conditions for safe storage, including any incompatibilities

- Store at temperatures not exceeding 50 °C/ 122 °F. Keep cool

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Exposure limits:

- None established.
- This material can generate Particulates Not Otherwise Classifiable (PNOC). The Occupational Safety and Health Administration (OSHA) PEL/TWA for PNOC is 15 mg/m³ for total dust and 5 mg/m³ for the respirable fraction. The American Conference of Governmental Industrial Hygienists (ACGIH) TLV/TWA for PNOC is 10 mg/m³ for inhalable particulates and 3 mg/m³ for respirable particulates.

Engineering measures:

- Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction.
- Provide appropriate exhaust ventilation at places where dust is formed.

8.2. Exposure controls

Eye protection: Safety glasses with side-shields. Goggles

Skin and body protection: Impervious clothing

Respiratory protection: Respirator must be worn if exposed to dust. Wear respirator with dust filter. Respiratory protection is needed if any of the exposure limits in Section 3 are exceeded. Consult an industrial hygiene professional prior to respirator selection and use. Use a positive-pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air-purifying respirators may not provide adequate protection. **WARNING:** Air purifying respirators do not protect workers in oxygen-deficient atmospheres.

Hand protection: Preventive skin protection.

Hygiene measures: Avoid contact with skin, eyes and clothing.

Special hazard: Workers should be protected from the possibility of contact
