Suitable extinguishing media: Foam. Water. Carbon dioxide (CO₂). Dry chemical. Alcohol resistant foams are preferred if available. General-purpose synthetic foams (including AFFF) or protein foams may function, but much less effectively.

Unsuitable extinguishing media: - None known

5.2. Special hazards arising from the substance or mixture:

Hazardous decomposition products: Burning produces obnoxious and toxic fumes
Aldehydes Carbon monoxide (CO) carbon dioxide (CO₂)

5.3. Advice for firefighters

Special protective equipment for firefighters: As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear

Under fire conditions: Cool containers / tanks with water spray Water mist may be used to cool closed containers Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air)

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

6.1.1. For non-emergency personnel:

Use personal protective equipment as required. Avoid contact with skin and eyes. Avoid dust formation. Remove all sources of ignition. Sweep up to prevent slipping hazard.

6.1.2. For emergency responders:

Use personal protection recommended in Section 8.

6.2. Environmental precautions:

Do not flush into surface water or sanitary sewer system. Do not allow material to contaminate ground water system.

6.3. Methods and material for containment and cleaning up:

Clean up promptly by scoop or vacuum. Sweep up and shovel into suitable containers for disposal.

Store at temperatures not exceeding 50 °C/ 122 °F. Keep cool No special restrictions on storage with other products.

7.3. Specific end use(s):

No data available

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Engineering measures: Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. Provide appropriate exhaust ventilation at places where dust is formed.

8.2. Exposure controls

8.2.1. Appropriate Engineering Controls:

Exposure limits: Not Established. This material can generate Particulates Not Otherwise Classifiable (PNOC). The Occupational Safety and Health Administration (OSHA) PEL/TWA for PNOC is 15 mg/m³ for total dust and 5 mg/m³ for the respirable fraction. The American Conference of Governmental Industrial Hygienists (ACGIH) TLV/TWA for PNOC is 10 mg/m³ for inhalable particulates and 3 mg/m³ for respirable particulates.

Hand protection: preventive skin protection.

Hygiene measures: Avoid contact with skin, eyes and clothing.

Respiratory protection: Respirator must be worn if exposed to dust. Wear respirator with dust filter. Respiratory protection is needed if any of the exposure limits in Section 3 are exceeded. Consult an industrial hygiene professional prior to respirator selection and use. Use a positive-pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air-purifying respirators may not provide adequate protection. **WARNING:** Air purifying respirators do not protect workers in oxygen-deficient atmospheres.

Special hazard: Workers should be protected from the possibility of contact with molten material during fabrication.

8.2.3. Environmental exposure controls: Do not flush into surface water or sanitary sewer system. Do not allow material to contaminate ground water system.
